There are a couple of typos (a P value of 0.0000 and measure should be measures) but otherwise this looks OK.
My main concern is simply that I don't remember this being presented to a broad WSA audience for discussion. These results seem fairly straightforward, however. Perhaps this poster could be prepared very soon and that used as the method for communication within WSA.

George

Here's another rush manuscript for the Feb 1 SOT deadline. It has not been reviewed outside Roger's group yet. Comments?

<< File: Abstract Kinser for sot2002 version 2.doc >>

Dear Rick,

please find attached the draft abstract of a poster on the Pilot study to be presented at the SOT meeting 2002. As you know the deadline for submission of abstract is Feb 1, 2002. So this going to be a fast track procedure. I am sorry for this, but at present I do not find another interesting meeting in spring/summer 2002, which could be an alternative to the SOT meeting.

Best regards,
Jan
